

Knowing the performance of your lights helps you understand what to do in post production in order to correct any deviation of colours.

The EBU has published Tech 3355.zip - TLCI-2012 Software to provide guidance.

The first set of independant lighting measurements has been done using this software.

\*Note the selection of lights in the .zip file is given for the convenience of users and does not constitute an endorsement of the product.

## TLCI results on 08/03/2017, from software version 2.016h (dated 06 March 2017)
